ISACA

CISM 3-Day Certification Exam Prep Training

This training course prepares you to demonstrate your understanding of the relationship between an information security program and broader business goals.

Course Overview

Our 3-day instructor-led CISM training and certification exam prep in Washington, DC Metro, Tysons Corner, VA, Columbia, MD or Live Online prepares you to demonstrate your understanding of the relationship between an information security program and broader business goals. Our certified instructors will teach you to take a comprehensive view of information systems security management and their relationship to organizational success. CISM candidates are an elite group of security individuals, and our experienced instructors will ensure that you benefit from the combined knowledge of your classroom peers.

The CISM (Certified Information Security Manager) certification from Information Systems Audit and Control Association (ISACA) shows that you have advanced knowledge of risk management and specific compliance and security management operations. The CISM certification tells your employer that you have the knowledge and experience to manage designs, and oversee and assess enterprise information security.
